

Nockolds Digital Vault

Digital Estate Management

Provided by  BePrepared

All your files in one secure place

PEACE OF MIND FOR YOU, COMFORT FOR THOSE LEFT BEHIND.

The Nockolds Digital Vault, provided by a third party cybersecurity company called BePrepared, is a highly encrypted and secure cloud storage platform where you will keep all of your most important records.

In the event of your death, we quickly and securely deliver this information to your executors or administrators.

Modern estates are infinitely more complex than those of previous generations. Today, most of our information is stored digitally behind passwords and firewalls, and accessing this data can be incredibly difficult, if not impossible.

With your Nockolds Digital Vault, you can make sure your Executors and Administrators have all the information and access they need to wrap-up your estate in months - not years.

Important Digital Items

CRYPTOCURRENCY	Bitcoin, Ethereum, Cardano etc.
EMAIL ACCOUNTS	Receipts, Subscriptions, Password Resets
PASSWORDS	Devices & Online Accounts
PHOTOS/VIDEOS	Memories & Messages
BUSINESS DOCUMENTS	Succession Plans, Asset Lists, Accounts
LEGAL DOCUMENTS	Power of Attorney, Will, Docusign

ALL YOUR IMPORTANT DOCUMENTS IN ONE PLACE

The Nockolds Digital Vault allows you to access your legal documents 24/7 - not only from us, but any other advisor connected to your vault too.

Leave comments on files, receive updates from advisors, collaborate, request updates and even have video advice uploaded into the portal.

Your Nockolds Digital Vault is now your single touchpoint for all your most important legal and financial information.

The information uploaded to the vault can only be accessed by you (unless you provide access to others). You retain ownership and control of the information and documents held within the vault.

The screenshot displays the 'Your Vault' interface. At the top left is a back arrow, and at the top right is a notification bell. Below the title 'Your Vault' are two buttons: 'Add New' with a dropdown arrow and 'Upload' with an upload icon. The main content is a table with three columns: 'Name', 'Assigned People', and 'Date'. The table lists several folders with their respective assigned people and dates.

Name	Assigned People	Date
Post Death	CH Claire Halfod	12/05/2022
Pre Death		13/05/2022
Crypto	Friends	15/05/2022
Folder Settify		17/05/2022
Important Passwords		17/05/2022
Annoying Things		19/05/2022
Important Legal Documents		02/06/2022

DIGITAL ASSETS: DO YOU KNOW WHAT HAPPENS TO YOUR PHOTOS OR PASSWORDS WHEN YOU DIE?

While it may be overwhelming to think about, we all possess countless digital assets. The Nockolds Digital Vault helps you store and protect all this data in one secure place.

Only you will have access to the private data uploaded to the vault unless you provide access. Nockolds and Be Prepared cannot see any of your private data.

MILITARY-GRADE SECURITY

BePrepared is a specialist provider of digital vaults, and the data uploaded to the vault is secured using three layers of encryption.

Each user's data is encrypted between their computer and our servers (SSL) then individually encrypted, first with their own unique key, secondly encrypted using the application key, and lastly encrypted with a database key.

The Nockolds Digital Vault is designed by BePrepared to a OWASP ASVS Level 3 build specification, and is compliant and certified with SOC2 and GDPR.

The Vault maintains a list of trusted devices, log all changes and who made them, and every time you log in, a single-use code is also messaged to you for use in conjunction with your password – meaning if a hacker got a hold of your login details, they still would not be able to gain access.

SSL Encryption

All data sent from your computer is encrypted before leaving (in transit).

Change Logging

All data changes are logged within our system to ensure traceability to potential bad actors.

Forced 2FA

Two Factor Authentication (TFA) is not optional on our platform.

Application Level

All data is encrypted again by the application's unique key before being saved.

Unique User Keys

Each user has a unique key that is used to encrypt only their data.

Intelligent Permissions

You control the data and who can see it. Your representatives and advisors only see the data you want them to see so they can work on documents together with you.

Database encryption

Once the encrypted data is stored, the database itself is automatically encrypted

RELEASING YOUR DATA

Your lawyer or executor will, upon viewing your death certificate, trigger the release process within the vault.

As part of the verification process, the vault will attempt to get in touch with you via email and phone.

Should it be unable to speak with you, it will then speak to your executors and advisors and ask them for their confirmation regarding your death.

A manual review of your death certificate is also performed.

Should all your recipients and legal representatives unanimously agree, your data will be released within 30 days.

If there is any disagreement, the releasing process is paused, and we speak with all parties to determine why there is a disagreement.

WHY?

When we pass away, executors and beneficiaries can no longer just divert the snail mail and go through a filing cabinet in the office. These days, half of our lives are digital.

Our email accounts contain invoices, bills, receipts, password resets and communications. Our computers contain important legal documents. Our phones contain thousands of photos and videos, treasured memories and notes. We have social media accounts, online share trading platforms and websites.

What was once a simple process is now a painful and drawn-out endeavour. By organising your digital estate, you can be a hero to your loved ones and save them months (and sometimes years) of stress and confusion.

WHAT HAPPENS NEXT?

1. You confirm you would like more information about setting up your vault.
2. Nockolds will upload your name and email address to the secure, encrypted platform for the purposes of sending you a link for you to access more information including the Be Prepared terms and conditions.
3. The Terms and Conditions and Privacy Notice set out the agreement between you and Be Prepared, which are governed by Australian law and jurisdiction.
4. If you are happy to proceed, you enter your personal details to set up your vault. The BePrepared system will then guide you through uploading your information and providing access to others.
5. BePrepared provide technical support should you need it to set up or manage your vault.

BePrepared is a trading name for The Prepared Company Pty Ltd, ABN 90 643 555 711, Registered office: Level 8, 1341 Dandenong Rd, VIC 3148, Australia. Website: www.BePreparedApp.com
